

PUMPMASTER  
**PG-10**

## BENEFITS

- Variable Speed
- Pumps Various Materials
- Compact

# MULTIPURPOSE GROUT PUMP

The Pumpmaster PG-10 is a skid steer grout pump attachment powered by your existing hydraulic powersource and is designed to perform from one job to the next with low maintenance.

# PUMPMASTER

# PG-10

## APPLICATIONS:

- Machine Base Stabilization
- Masonry Block Fill
- Piling Encasements
- Pressure Grouting
- Slabjack/Mudjack Lifting
- Void Fill

The Airplaco PG-10 is a hydraulic grout pump featuring a full-flow ball check manifold and is designed for masonry block fill, piling encasements, pea gravel pumping, concrete leveling and other grouting applications. The PG-10 hydraulic grout pump offers high output without the need for constant lubrication and features a long-life hard chrome cylinder that ensures a long service life. The PG-10 grout pump is a perfect choice for contractors with an existing hydraulic power source, such as a skid steer or hydraulic power pack looking for a durable pump capable of varied applications.

## PEA-ROCK DISCHARGE

## LONG LIFE™ HARD CHROME CYLINDER

## VARIABLE SPEED

## PG-10 SPECIFICATIONS

Max Output	4 yd <sup>3</sup> /hr (3 m <sup>3</sup> )
Max Line Pressure	0 to 400 psi (27 bar)
Material Hopper	7 cu ft (198L)
Material Cylinder	Single 5 in.
Stroke	8 in.
Outlet Size	3 in. HD
Max Aggregate	3/8 in. (9.5 mm)
Max Vertical	50 ft (15 m)
Max Horizontal	150 ft (46 m)
Power Source	Aux. Hydraulics (Min 8 gpm @2500 psi)
Dimensions	29 x 68 x 38 in. (W x L x H)
Hopper Height	36 in (92 cm)
Weight	325 lb (147 kg)
Material Valve	Ball-check

*Disclaimer: Maximum output distance and pressure cannot be reached simultaneously. Performance will vary depending on the operator, cycle rate, mix design, and placement line.*
